**RESIDENT FALCONER
HARVEST QUOTA SYSTEM
HARRIS'S HAWK**

Use this procedure if you are a resident falconer harvesting a Harris's hawk in Arizona. This procedure does not apply to nonresident falconers or to other raptors that may be legally taken under Commission Order 25.

The Department has established an annual harvest limit (quota) system for resident falconers harvesting Harris's hawk. This system allows the Department to set an annual harvest limit for a population, while allowing for the flexibility of harvest outside the traditional permit system. The annual harvest limit for resident falconers is **30 Harris's hawks annually** within the season dates and open areas described under Commission Order 25.

Capture of Harris' hawks by resident licensed falconers is allowed with a valid Arizona Sport Falconry License from January 1 –31, May 1 – December 31 or until the annual harvest limit is reached and the season closes. Harris' hawk capture is open in all Game Management Units except those in Yuma and La Paz counties.

Procedures:

Prior to harvesting a Harris's hawk for falconry, a resident falconer **must:**

1. Ensure that they have the proper hunting license and Arizona Sport Falconry License (R12-4-422 (Q)(1)).
2. Ensure that they are within the season dates and open areas eligible for harvest established under Commission Order 25.
3. Ensure that their facilities can house the addition of the raptor (R12-4-422 (M)).
4. Ensure that they are within their two bird per calendar year allocation (R12-4-422 (Q)(4)).
5. Call the Department at **1-855-970-HAWK (4295)** to ensure that the season is still open. Even if a falconer is within the season dates established under Commission Order 25, the season will close and no further harvest will be permitted once the annual harvest limit has been achieved.
6. Ensure the Harris's hawk is banded within five consecutive days of capture (R12-4-422 (R)(1)).

The Department will monitor the number of resident banded Harris's hawks. Once the resident annual harvest limit is reached, the Department will close the season and update the recording at **1-855-970-HAWK (4295)** by Wednesday at 5:00 pm. Harvest after the season is closed is a violation of A.R.S § 17-309 (A)(11).

Harris' hawks must be banded by Department personnel, their representative, or a General or Master licensed falconer within five days of capture (R12-4-422.R.1.). **We request that you contact one of the Department's Regional Falconry Coordinators prior to your hunt to schedule an appointment for banding.
